Steps of installation

1

Note: The ceiling must be able to bear a weight of 20 IBS. Then, follow the steps below to fix the mounting plate onto the ceiling.

2

Install the fan blades by screwing on the washers and attaching them to the motor.

3

Connect the wires on the light source cover to the wires on the motor by color, align the screw holes on the motor with the light source cover, and then fix the screws with a screwdriver. Then twist the acrylic lampshade clockwise over the light source lampshade.

4

Then connect the drive power supply and the motor reserve line together, and then connect it to the reserve line on the ceiling and to the terminal block. Finally, fix the overall top cover position onto the installation plate.

Install the fan blades (F) onto the motor (G) using screws and washers. Then, insert the wire colors on the motor (G) into the slots inside the light source cover (H). Next, align the holes on the light source cover (H) with those on the motor (G), tighten the screws, and then screw the light source cover (I) onto the light source cover (H) clockwise. Then, connect the reserved wires to the power supply (D), and connect the reserved wires on the power supply (D) to the reserved wires at the terminal (C) on the mounting board. Insert the metal nails into the ceiling, align the screw (A) with the mounting board (B), and fix it with nuts and washers. Finally, align the cylinder inside the light source cover (E) of the lamp body onto the groove of the mounting board (B), rotate the light source cover (E) of the lamp body to tighten it.
