

Warning:

This product must be installed by personnel who are familiar with its structure and related hazards, in accordance with the installation specifications. This product is suitable for indoor installation.

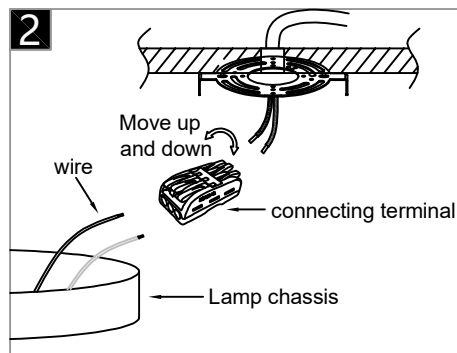

Product style diagram

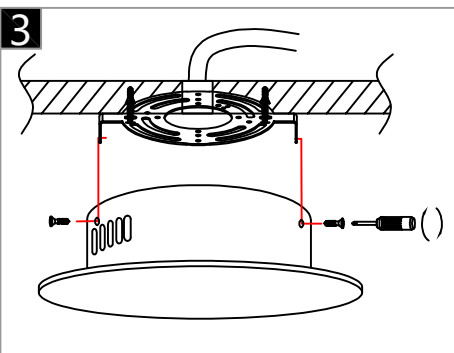

Steps of installation

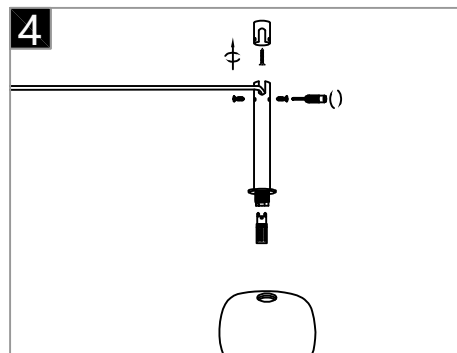

Install the T-shaped bracket onto the main body of the lamp, and then secure it with screws.

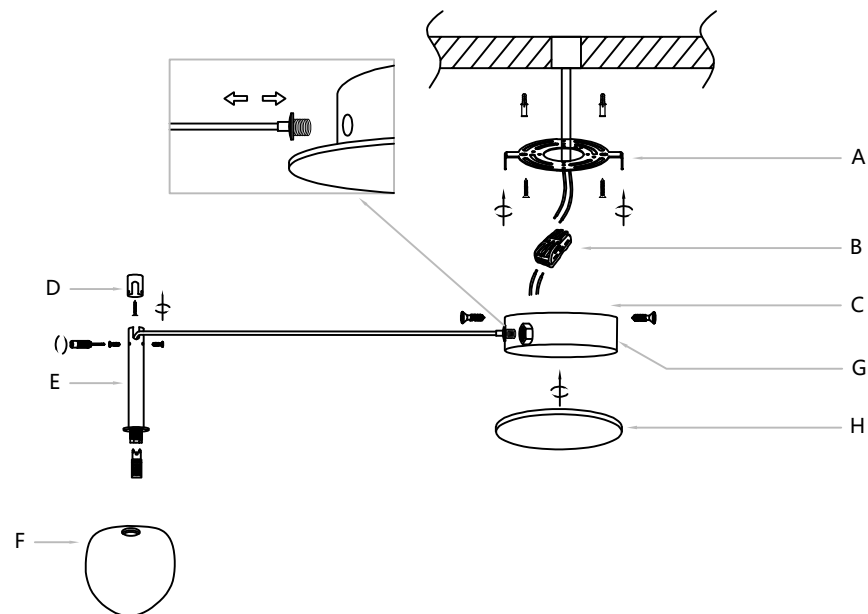

Connect the wires inside the luminaire and ceiling to the terminal, usually neutral wire (white), hot wire (black)

Align the two holes on the top cover of the lamp with the holes on the installation plate on the ceiling, and then secure them with screws.

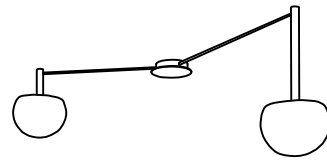

Remove the lamp arm cover, adjust the angle, and screw it into the ceiling with self-tapping screws. Then install the light source and the glass cover.

Fix the mounting plate (A) to the ceiling. Next, connect the wires reserved for the top cover (C) to the terminal block (B) on the ceiling. Then align the holes on the top cover (C) with the holes on the mounting plate (A), and tighten the screws. Remove the lamp arm cover (D), then adjust the angle and screw it into the ceiling using self-tapping screws. Next, align the holes on the lamp arm (E) with the lamp arm cover (D), and fix it with screws. Then install the light source, and install the glass cover (F). Press the locking extension piece (G) to adjust the length of the wires, and then screw the bottom cover (H) onto the top cover (C).
