

Warning:

This product must be installed by personnel who are familiar with its structure and related hazards, in accordance with the installation specifications. This product is suitable for indoor installation.

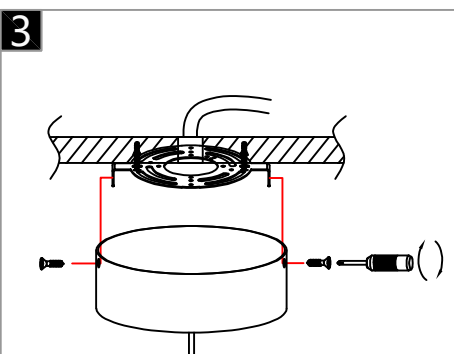

Steps of installation

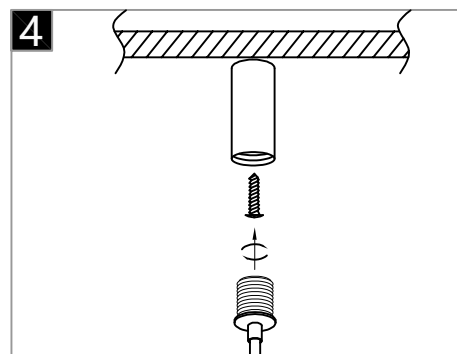

Fix the mounting plate to the ceiling using self-tapping screws.

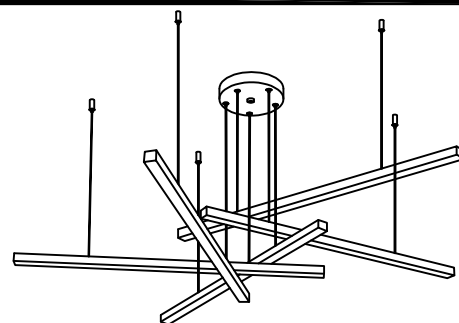

Connect the wires inside the luminaire and ceiling to the terminal, usually neutral wire (white), hot wire (black)

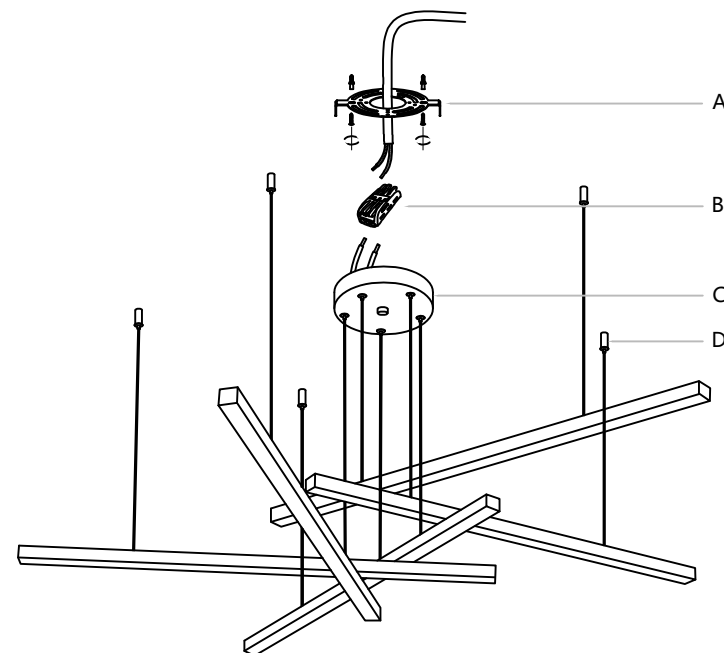

Align the holes on the top cover with the holes on the mounting plate, and then secure them with screws.

Place the iron pin at the desired Angle, then attach it to the ceiling with self-tapping screws, and then fasten it with locking wire. Screw it on the iron pin.

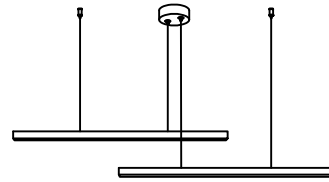

Product style diagram

Use self-tapping screws to fix the installation plate (A) to the ceiling. Then connect the wires inside the top cover plate (C) to the wires on the ceiling and the junction box (B). Align the screw holes on the top cover plate (C) with the holes on the installation plate (A), and fix them with screws. Next, adjust the angle of the iron nails (D) and then fix them to the ceiling.

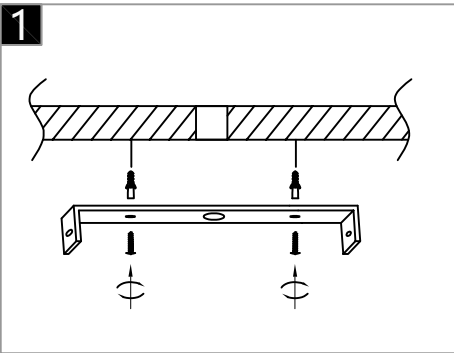

Warning:

This product must be installed by personnel who are familiar with its structure and related hazards, in accordance with the installation specifications. This product is suitable for indoor installation.
