

Warning:

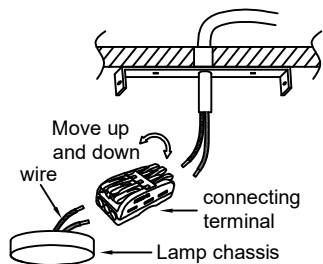

This product must be installed by personnel who are familiar with its structure and related hazards, in accordance with the installation specifications. This product is suitable for indoor installation.

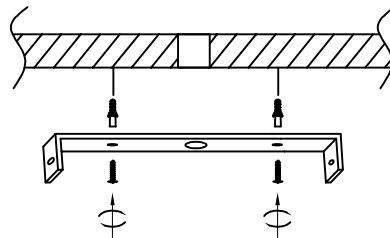

Product style diagram

Steps of installation**1**

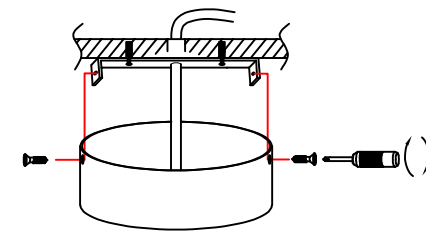

Unscrew three metal decorative panels in different directions and place them on the lamp body ball. Then, pass the wires through the connecting rods of the lamp body and fix them onto the lamp body ball using the connecting rods.

3

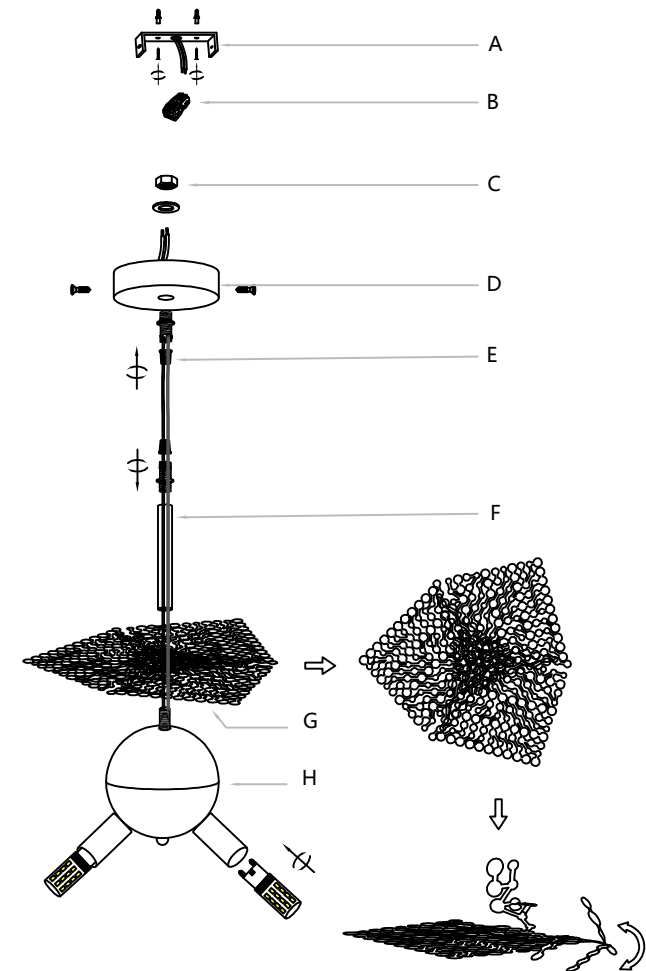

Connect the wires inside the luminaire and ceiling to the terminal, usually neutral wire (white), hot wire (black)

2

Attach the mounting plate to the ceiling with self-tapping screws.

4

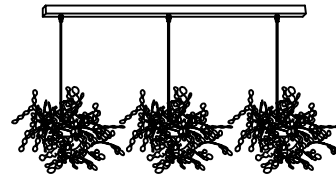

Align the holes on the top cover with the holes on the mounting plate, and then secure them with screws.

Divide the metal decorative panel (G) into three equal parts as shown in the diagram and place it on the lamp body ball (H). Then, twist them in different directions to achieve the desired shape. Next, pass the wires through the connecting rod (F), and then screw the connecting rod (F) onto the lamp body ball (H). Then, fix it with the wire lock clip (E). Then screw it onto the top cover (D), lock it with the nut (C), and then drive the installation plate (A) into the ceiling with self-tapping screws. Then connect the wires to the terminal block (B), and align the holes on the top cover (D) with the installation plate (A), and lock it with screws.

Steps of installation

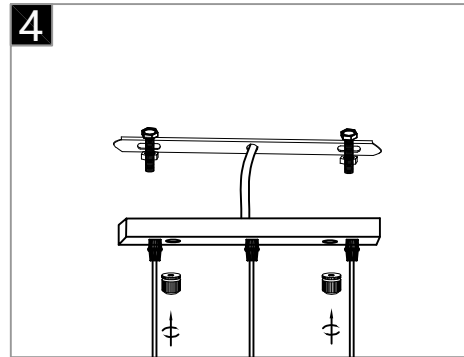

Unscrew three metal decorative panels in different directions and place them on the lamp body ball. Then, pass the wires through the connecting rods of the lamp body and fix them onto the lamp body ball using the connecting rods.

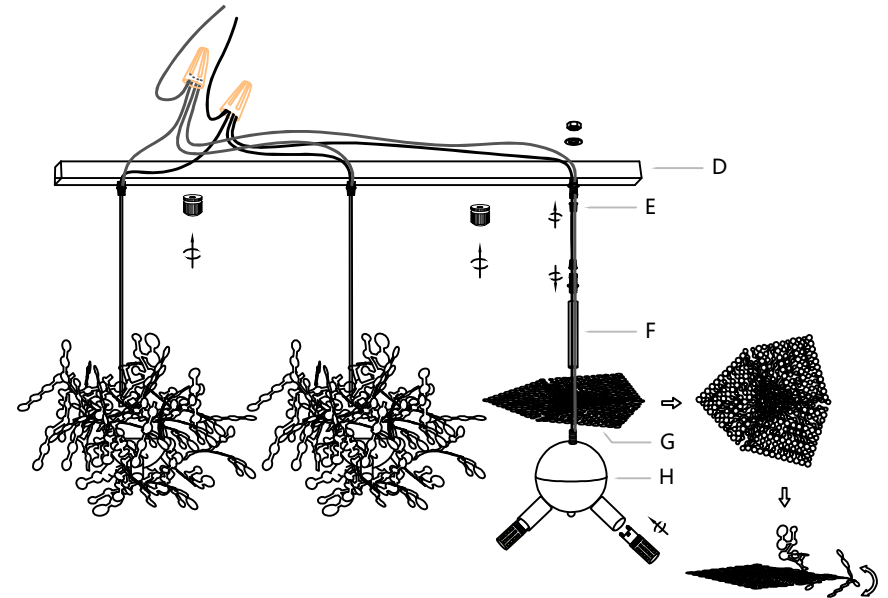

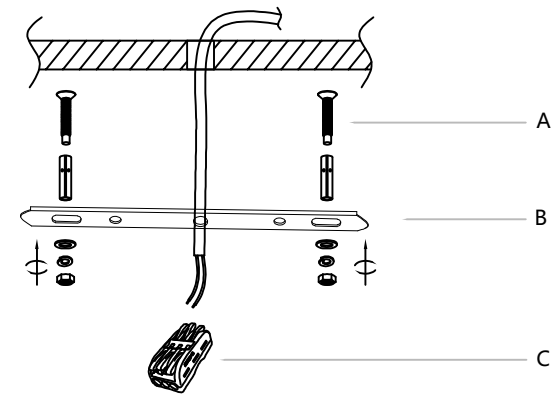

Separate the wires on the top cover by color, then tighten them with the wire lock cap, and then connect it together with the wires on the ceiling to the terminal block.

First, fix the expansion screws onto the ceiling, and then lock the mounting plate onto the screws.

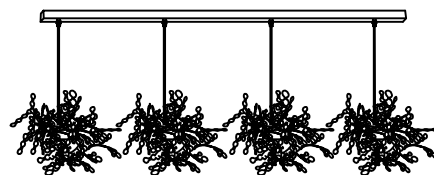

Align the bottom holes on the top cover with the screws on the mounting plate, and then tighten them with a wing nut.

Divide the metal decorative panel (G) into three equal parts as shown in the figure and place them on the lamp body ball (H). Then, twist them in different directions to achieve the desired shape. Next, thread the wires through the connecting rod (F), then screw the connecting rod (F) onto the lamp body ball (H). Then, use the lock wire clip (E) to secure it. After that, twist the wires according to the color onto the terminal cap. Then, insert the iron pin into the screw (A) and fix it onto the screw (A) on the ceiling. Next, attach the top cover (D) and the reserved wires on the ceiling to the terminal block (C). Finally, align the holes on the bottom of the top cover (D) with the screws on the installation plate (B). Then, tighten it with the flower-shaped nut.

Steps of installation

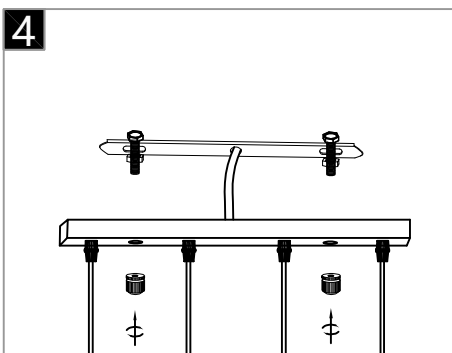

Unscrew three metal decorative panels in different directions and place them on the lamp body ball. Then, pass the wires through the connecting rods of the lamp body and fix them onto the lamp body ball using the connecting rods.

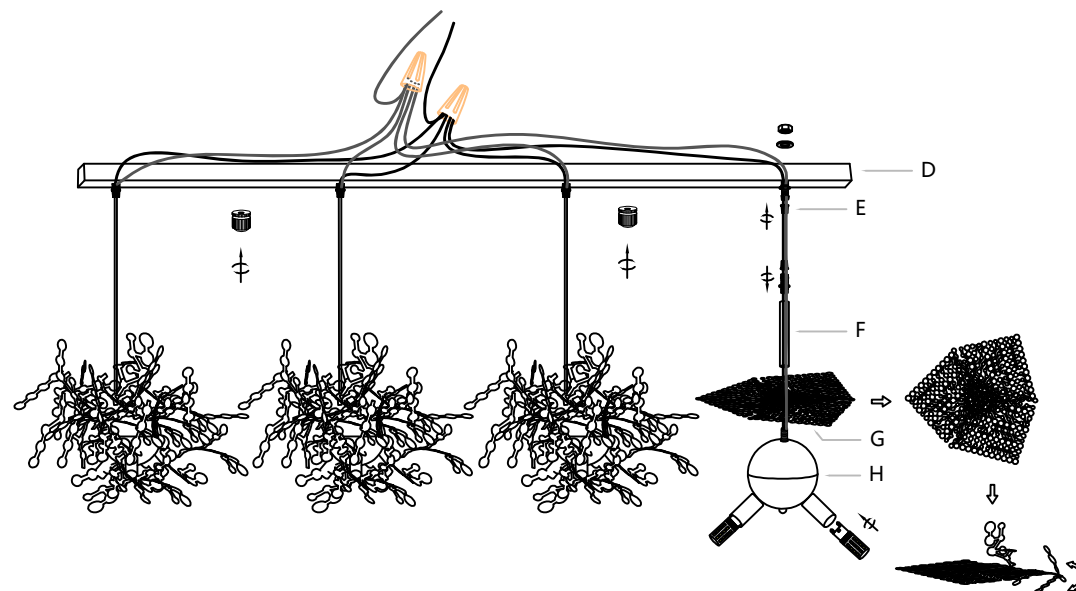

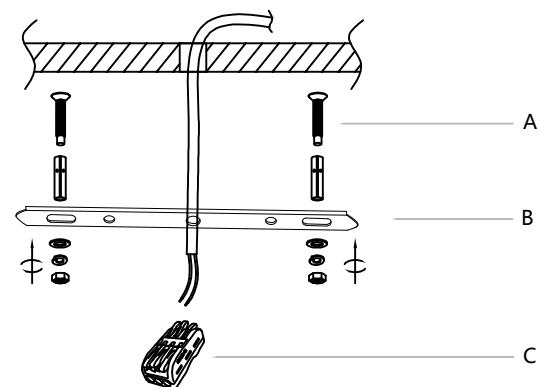

Separate the wires on the top cover by color, then tighten them with the wire lock cap, and then connect it together with the wires on the ceiling to the terminal block.

Attach the mounting plate to the ceiling with self-tapping screws.

Align the hole on the side of the integral lamp canopy with the hole on the mounting plate and lock it tightly with screws.

Divide the metal decorative panel (F) into three equal parts as shown in the diagram, and place it on the lamp body ball (G). Then, rotate them in different directions to achieve the desired shape. Next, pass the wires through the connecting rod (E), and then screw the connecting rod (E) onto the lamp body ball (G). Finally, fix it with the wire lock clip (D). Fix the mounting plate (A) to the ceiling. Next, connect the wires reserved for the top cover (C) to the wires on the ceiling, and then connect them to the terminal block (B). Then, align the holes on the top cover (C) with the holes on the mounting plate (A), and tighten the screws.
